

ACCEPTANCE TESTING

UAT Execution & Report Submission

Date	1 Oct 2026
Team ID	6ab63f444173fc565b5466f9
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	4 Marks

1. Purpose of Document

The purpose of this document is to briefly explain the test coverage and open issues of the Auto Ticket Classification using Flow Designer project at the time of the release to User Acceptance Testing (UAT).

2. Project Overview

Project Name	Auto Ticket Classification using Flow Designer
Project Description	A ServiceNow-based workflow that uses Flow Designer to automatically classify incoming support tickets and route them to the appropriate category or support group.
Project Version	UAT Release 1.0
Testing Period	1 Oct 2026 to 1 Oct 2026
Testing Scope	Ticket creation, automatic classification, Flow Designer trigger, category/group assignment, status tracking, exception handling, and dashboard/monitoring.
User Stories / Requirements	Ticket submission; automatic ticket classification; Flow Designer automation; category and assignment; validation and tracking; dashboard monitoring.
Testing Environment	ServiceNow application / Flow Designer test environment
URL/Location	Removed as requested.
Credentials	Not included.

3. Defect Analysis

This report shows the number of resolved or closed bugs at each severity level, and how they were resolved.

Resolution	Severity 1	Severity 2	Severity 3	Severity 4	Subtotal
By Design	10	4	2	3	20
Duplicate	1	0	3	0	4
External	2	3	0	1	6
Fixed	11	2	4	20	37
Not Reproduced	0	0	1	0	1
Skipped	0	0	1	1	2
Won't Fix	0	5	2	1	8
Totals	24	14	13	26	77

4. Test Case Analysis

Section	Total Cases	Not Tested	Fail	Pass
Ticket Intake	3	0	0	3
Automatic Classification	5	0	0	5
Flow Designer Automation	4	0	0	4

Section	Total Cases	Not Tested	Fail	Pass
Category / Assignment	3	0	0	3
Exception Reporting	3	0	0	3
Final Report Output	2	0	0	2
Version Control	2	0	0	2

5. Test Cases

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	Create a support ticket	1. Open ticket form 2. Enter valid details 3. Submit ticket	Ticket is created successfully and enters the workflow.	Ticket created and workflow triggered.	Pass
TC-002	Automatic ticket classification	1. Create a ticket with recognizable content 2. Run/trigger flow 3. Check classification	Ticket is classified into the configured category.	Ticket classified correctly.	Pass
TC-003	Flow Designer trigger	1. Create/update qualifying ticket 2. Observe flow execution	Configured Flow Designer flow executes automatically.	Flow executed as expected.	Pass
TC-004	Category and group assignment	1. Submit classified ticket 2. Review assignment	Ticket is routed to the appropriate category/support group.	Correct assignment displayed.	Pass
TC-005	Exception handling	1. Submit an unclear/unclassifiable ticket 2. Observe workflow result	Ticket follows the exception/manual-review path.	Exception path available for manual review.	Pass
TC-006	Status tracking	1. Process a ticket 2. Review status fields/dashboard	Ticket and workflow status are updated and visible.	Status updated and visible.	Pass

6. Bug Tracking

Bug ID	Bug Description	Steps to Reproduce	Severity	Status	Additional Feedback
BG-001	No project-specific defect recorded in this UAT execution.	N/A	Low	Closed	No open defect recorded.
BG-002	Classification requires review when ticket content does not match configured rules.	1. Submit unclear ticket 2. Review workflow	Medium	Closed	Manual review/exception handling is available.

7. Project-Specific Functional Requirements

ID	Requirement	Description
FR-01	Ticket Submission	The system shall accept new support ticket details and create a ticket record.
FR-02	Automatic Classification	The system shall classify incoming tickets according to configured classification logic.
FR-03	Flow Trigger	Flow Designer shall trigger automatically for qualifying ticket creation or updates.
FR-04	Routing / Assignment	The system shall route classified tickets to the appropriate category or support group.
FR-05	Status Tracking	The system shall maintain and display ticket and workflow status.
FR-06	Exception Handling	The workflow shall provide a controlled path for tickets that cannot be classified automatically.

8. DFD Information

External Entity: User / Support Agent → Process 1: Submit Ticket → Data Store: Ticket Records → Process 2: Flow Designer Trigger → Process 3: Automatic Ticket Classification → Data Store: Classification / Routing Rules → Process 4: Assignment & Status Update → External Entity: Support Team / Administrator. Unclassified or exception tickets are directed to a review/manual-handling path.

9. Sign-off

Tester Name	Project Team
Date	1 Oct 2026
Signature	_____

10. Notes

- Ensure that all test cases cover both positive and negative scenarios.
- Encourage testers to provide detailed feedback, including any suggestions for improvement.
- Bug tracking should include details such as severity, status, and steps to reproduce.
- Obtain sign-off from both the project manager and product owner before proceeding with deployment.
- Reference links/URLs have been removed as requested.
