

Project Demonstration & Live Execution Guide

Auto Ticket Classification using Flow Designer

PROJECT TITLE

Auto Ticket Classification using Flow Designer

TEAM ID

6ab63f444173fc565b5466f9

DEMONSTRATION DATE

2 Oct 2026

STATUS

Validated & Ready

1. DEMONSTRATION PROCEDURE

Step 1: Ticket Creation in Portal

Create a test ticket with raw user text: "VPN connection failed repeatedly during remote session."

Step 2: Flow Designer Rule Execution

Observe the automated execution of Flow Designer triggers upon record insert without human intervention.

Step 3: Auto-Classification Verification

Confirm that fields update dynamically: **Category: Network, Subcategory: VPN, Priority: High.**

Step 4: Queue Routing & Email Notification

Verify ticket assignment to the *Network Support Team* queue and instant notification delivery.

2. LIVE DEMONSTRATION SCENARIOS

Demo ID	Scenario	Input Text	Routed Team	Status
DEMO-01	Network Outage	"VPN disconnects every 5 minutes"	Network Team	PASSED
DEMO-02	Hardware Fault	"Laptop screen flickering continuously"	Hardware Desk	PASSED
DEMO-03	Software License	"Requesting license key for Figma"	Software Team	PASSED
DEMO-04	General Inquiry	"What are the office working hours?"	L1 Service Desk	PASSED
